MODEL 118 CLAY DIGGER

PART # 5201 (7/8" HEX x 3-1/4")
PART # 5202 (1" HEX x 4-1/4")

The APT Model 118 Clay Digger is used for digging clay, shale, hard pan and frozen ground. The Model 118 is an ideal tool for clearing out dirt under existing foundations and for tunneling under existing structures. This medium weight tool can be used for horizontal work and for vertical work. The only difference between the M117, M118 and M119 tools are the handles. These tools have the same cylinders and the majority of the internal parts in common, which makes them very versatile tools for use in various types of work. The M118 features APT's patented Ball Valve design.

(Pat. # 8,276,682 B2)
